Summary

Who we are and what we do

The Boundary Commission for England is an independent and impartial non-departmental public body which is responsible for reviewing Parliamentary constituency boundaries in England.

The 2018 Review

We have the task of periodically reviewing the boundaries of all the Parliamentary constituencies in England. We are currently conducting a review on the basis of rules set by Parliament in 2011. The rules tell us that we must make recommendations for new Parliamentary constituency boundaries in September 2018. They also result in a significant reduction in the number of constituencies in England (from 533 to 501), and require that every constituency – apart from two specified exceptions – must have an electorate that is no smaller than 71,031 and no larger than 78,507.

Initial proposals

We published our initial proposals for the new Parliamentary constituency boundaries in England on 13 September 2016. Information about the proposed constituencies is now available on our website.

What is changing in the Eastern region?

The Eastern region has been allocated 57 constituencies – a reduction of one from the current number.

Our proposals leave six of the 58 existing constituencies unchanged.

As it has not always been possible to allocate whole numbers of constituencies to individual counties, we have grouped some county and local authority areas into sub-regions. The number of constituencies allocated to each sub-region is determined by the electorate of the combined local authorities.

Consequently, it has been necessary to propose some constituencies that cross county or unitary authority boundaries.

3

Sub-region	Existing allocation	Proposed allocation
Bedfordshire	6	6
Cambridgeshire, Hertfordshire and Norfolk	27	27
Essex	18	17
Suffolk	7	7

In Cambridgeshire, Hertfordshire and Norfolk, it has been necessary to propose two constituencies that cross county boundaries. We have proposed one constituency that contains electors from both Cambridgeshire and Norfolk, which combines the village of Littleport and the town of Downham Market. We have also proposed one constituency that contains electors from both Cambridgeshire and Hertfordshire, which combines three wards from the district of South Cambridgeshire in a constituency with the towns of Letchworth and Royston.

In Bedfordshire, Essex and Suffolk it has been possible to propose a pattern of constituencies that is within the boundaries of each county.

How to have your say

We are consulting on our initial proposals for a 12-week period, from 13 September 2016 to 5 December 2016. We encourage everyone to use this opportunity to help us shape the new constituencies – the more views we hear, the more informed our decisions will be when considering whether to revise our proposals.

Our website at www.bce2018.org.uk has more information about how to respond as well as details of where and when we will be holding public hearings in your area. You can also follow us on Twitter @BCE2018 or using #2018boundaryreview.

What is the Boundary Commission for England?

1 The Boundary Commission for England (BCE) is an independent and impartial non-departmental public body which is required to review Parliamentary constituency boundaries in England. We conduct a review of all the constituencies in England every five years. Our role is to make recommendations to Parliament for new constituency boundaries.

2 The Chair of the Commission is the Speaker of the House of Commons, but by convention he does not participate in the review. The current Deputy Chair, Mrs Justice Patterson, and two further Commissioners, take decisions on proposals and recommendations for new constituency boundaries. Further information about the Commissioners can be found on our website.¹ You can find further information on our website, at www.bce2018.org.uk. You can also contact us with any general enquiries by emailing information@ boundarycommissionengland.gov.uk, or by calling 020 7276 1102.

2 Background to the 2018 Review

3 We are currently conducting a review of Parliamentary constituency boundaries on the basis of rules set by Parliament in 2011.² These rules require us to reduce the number of constituencies in the UK and make more equal the number of electors in each constituency. This report covers only the work of the Boundary Commission for England (there are separate Commissions for Northern Ireland, Scotland, and Wales) and, in particular, introduces our initial proposals for the Eastern region.

The rules set out in the legislation 4 state that there will be 600 Parliamentary constituencies covering the UK - a reduction of 50 from the current number. This means that the number of constituencies in England must be reduced from 533 to 501. There are also other rules that the Commission has regard to when conducting the review - a full set of the rules can be found in our Guide to the 2018 Review³ published in summer 2016, but they are also summarised later in this chapter. Most significantly, the rules require every constituency we recommend (with the exception of two covering the Isle of Wight) to contain no fewer than 71,031 electors and no more than 78,507.

This is a significant change to the old 5 rules under which Parliamentary boundary reviews took place, in which achieving as close to the average number of electors in each constituency was an aim, but there was no statutory fixed permissible range. For example, in England, existing constituencies (drawn under the previous rules) currently range from 54,232 to 105,448 electors. Furthermore, the current constituencies were constructed under the last completed review, which relied on the data contained in the electoral registers for 2000 and applied the earlier version of the rules. Achieving a more even distribution of electors in every constituency across England, together with the reduction in the total number of constituencies, means that a significant amount of change to the existing map of constituencies is inevitable.

6 Our *Guide to the 2018 Review* contains further detailed background information, and explains all the policies and procedures that we are following in conducting the review. We encourage anyone wishing to be involved in the review to read this document, which will give them a greater understanding of the rules and constraints placed on the Commission, especially if they are intending to comment on our initial proposals.

The rules in the legislation

7 As well as the primary rule that constituencies must have no fewer than 71,031 electors and no more than 78,507, the legislation also states that, when deciding on boundaries, the Commission may also take into account:

- special geographical considerations, including in particular the size, shape and accessibility of a constituency;
- local government boundaries as they existed on 7 May 2015;
- boundaries of existing constituencies; and
- any local ties that would be broken by changes in constituencies.

8 In addition, in relation to local government boundaries in particular, it should be noted that we are obliged to take into account local government boundaries as they existed in May 2015, rather than any subsequent changes that may have been made (or are due to be made). Our initial proposals for the Eastern region (and the accompanying maps) are therefore based on local government boundaries as they existed in May 2015. Our Guide to the 2018 Review outlines further our policy on how, and to what extent, we take into account local government boundaries. We have used the wards as at May 2015 of unitary authorities, and boroughs and district councils (in areas where there is also a county council) as the basic building blocks for our proposals.

9 Although the first review under the new rules will unavoidably result in significant change, we have also taken into account the boundaries of existing constituencies so far as we can. We have tried to retain existing constituencies as part of our initial proposals wherever possible, as long as the other factors can also be satisfied. This, however, has proved difficult. Our initial proposals retain just over 10% of the existing constituencies in the Eastern region - the remainder are new constituencies (although in a number of cases we have been able to limit the changes to existing constituencies, making only minor changes as necessary to enable us to comply with the rules).

Our proposals are based on the nine 10 regions used for European elections (though it should be clear that our work has no effect on European electoral matters, nor is it affected by the recent referendum result). This report relates to the Eastern region. There are eight other separate reports containing our initial proposals for the other regions. You can find more details on our website. While this approach does not prevent anyone from making proposals to us that cross regional boundaries (for example, between the Eastern region and the London region), very compelling reasons would need to be given to persuade the Commission to depart from the region-based approach. The Commission has previously consulted on the use of the regions as building blocks, and this was supported.

Timetable for our review

Stage one – development of initial proposals

We began this review in February 11 2016. We published electorate data from December 2015 for each ward, local government authority, and existing constituency. The electorate data were provided by local authorities and the Office for National Statistics. These are available on our website⁴ and are the data that must be used throughout the remainder of the review process. The Commission has since then considered the factors outlined above and drawn up the initial proposals. We published our initial proposals for consultation for each of England's nine regions on 13 September 2016.

12 We ask people to be aware that, in publishing our initial proposals, we do so without suggesting that they are in some way definitive, or that they provide the 'right answer' - they are our starting point for consulting on the changes. We have taken into account the existing constituencies, local government boundaries, and geographical features to produce a set of constituencies that are within the statutory electorate range and that we consider to be the best balance between those factors at this point. What we do not yet have is evidence and intelligence of how our proposals reflect or break local community ties. One of the most important purposes of the consultation period is to seek evidence that will enable us to review our initial proposals.

Stage two – consultation on initial proposals

13 We are consulting on our initial proposals for 12 weeks, until 5 December 2016. Chapter 4 outlines how you can contribute during the consultation period. We are also hosting four public hearings in the Eastern region, at which people can give their views direct to one of our Assistant Commissioners. Once the consultation has closed, the Commission will collate all the responses received, including records of the public hearings.

Stage three – consultation on representations received

14 We are required to publish all the responses we receive on our initial proposals. This publication will mark the start of a four-week 'secondary consultation' period, likely to take place in spring 2017. The purpose of the secondary consultation is for people to see what others have said in response to our initial proposals, and to make comments on their views, for example by countering an argument, or by supporting and reinforcing what others have said. You will be able to see all the comments on our website, and use the site to give us your views on what others have said.

⁴ At www.bce2018.org.uk

9

Stage four – development and publication of revised proposals

15 Once we have all the representations and comments from both the initial and secondary consultation periods, the Commission will analyse those representations and decide whether changes should be made to the initial proposals. If we decide that the evidence presented to us persuades us to change our initial proposals, then we must publish our revised proposals for the areas concerned, and consult on them for a further period of eight weeks. This is likely to be towards the end of 2017. When we consult on our revised proposals, there will be no further public hearings, nor will there be a repeat of the four-week period for commenting on the representations of others. You will be able to see all our revised proposals, and give us your views on them, on our website.

Stage five – development and publication of the final report and recommendations

16 Finally, following the consultation on revised proposals, we will consider all the evidence received at this stage, and throughout the review, before determining our final recommendations. The recommendations will be set out in a published report to the Government, who will present it, without amendment, to Parliament on our behalf. The legislation states that we must report to the Government in September 2018. Further details about what the Government and Parliament then do with our recommendations are contained in our *Guide to the 2018 Review*.

17 Throughout each consultation we will be taking all reasonable steps to publicise our proposals, so that as many people as possible are aware of the consultation and can take the opportunity to contribute to our review of constituencies.

3 Initial proposals for the Eastern region

18 The Eastern region comprises the counties of Bedfordshire, Cambridgeshire, Hertfordshire, Essex, Norfolk and Suffolk. These counties are covered by a mixture of district councils, county councils and unitary authorities.

19 The region currently has 58 constituencies. In this review the region has been allocated 57 constituencies, a reduction of one. Of the 58 existing constituencies only 20 have electorates within 5% of the electoral quota (within the range of 71,031 to 78,507 registered electors). In addition, the electorates of 27 constituencies currently fall below the lower 5% limit, while the electorates of 11 constituencies fall above the upper limit.

20 In seeking to produce initial proposals for the region whereby 57 whole constituencies would have an electorate within 5% of the electoral quota, we first considered whether local authority areas could usefully be grouped into subregions. Our approach when grouping local authority areas together in subregions was based on trying to respect county boundaries wherever possible and on achieving (where we could) obvious practical groupings such as those dictated in some part by the geography of an area.

21 Nevertheless, our division of the Eastern region into sub-regions is a purely practical approach. Respondents to our consultation are welcome to make counter-proposals based on other groupings of counties and unitary authorities, if the statutory factors can be better reflected in those counter-proposals.

22 When thinking about sub-regional groupings for the Eastern region we noted that the county of Cambridgeshire

(which includes the unitary authority of Peterborough) has an allocation of 7.4 constituencies based on an electorate of 554.887. With an allocation of seven whole constituencies, Cambridgeshire's constituencies have an average electorate size of 79,270. The size of electorates in these constituencies makes it impossible to allocate to Cambridgeshire seven constituencies that fall within 5% of the electoral quota. Therefore Cambridgeshire needs to be grouped with a neighbouring county. We noted that Norfolk has an electorate of 645,761, which gives an allocation of 8.6 constituencies. The latter allocation translates into an average constituency size of 71,751 when Norfolk is allocated nine whole constituencies - just 720 electors above the lower limit of the 5% target. The size of these electorates in Norfolk makes it clear that it would be extremely hard to build nine constituencies within the county that are also within 5% of the electoral quota. We therefore decided to group Norfolk and Cambridgeshire into a sub-region, so that we could propose constituencies within 5% of the electoral quota.

23 We also noted that Hertfordshire has an electorate of 801,230, which gives an allocation of 10.7 constituencies. An allocation of 11 whole constituencies to Hertfordshire gives an average constituency size of 72,839. Electorates of this size in Hertfordshire could allow us to build 11 constituencies within 5% of the electoral quota. But given the dense pattern of settlements in some parts of the county, which make it challenging not to divide towns between constituencies, we decided that we could have better regard for the statutory factors if Hertfordshire were included in a sub-region with another county or counties.

24 We noted that Essex and Bedfordshire both have electorates that come close or very close to allowing a whole number of constituencies to be allocated (see below). Given this fact we decided that there would be no practical benefit gained from including either of these counties in a sub-region with Hertfordshire. We thus propose to group Hertfordshire with Cambridgeshire and Norfolk in a single sub-region. This arrangement allows us to build a limited number of constituencies that cross county boundaries, and hence create 27 constituencies within 5% of the electoral quota, while also having regard to other statutory factors.

The ceremonial county of 25 Bedfordshire (comprising the unitary authorities of Luton, Central Bedfordshire and Bedford) has an electorate of 439,574, which gives an allocation of 5.9 constituencies. With our proposed allocation of six whole constituencies, the average size of constituencies in Bedfordshire is 73,262. Although this is lower than the electoral quota of 74,769, it is not low enough to indicate to us that problems would be encountered when building six constituencies within the county's boundary. Hence we propose to create six constituencies within the county.

26 The county of Essex (including the boroughs of Thurrock and Southendon-Sea) has an electorate of 1,274,597, which gives an allocation of almost exactly 17 constituencies (17.05). Currently Essex has 18 constituencies so our proposed allocation of 17 whole constituencies sees the county's allocation reduced by one, giving an average constituency size of 74,976, which is very close to the electoral quota of 74,769. However, having an average electorate size so close to the electoral quota will not mean that constituencies in Essex undergo little change to their boundaries. The reduction in the number of constituencies by one in the county makes significant change inevitable.

27 The county of Suffolk has an electorate of 526,217, which gives an allocation of almost precisely seven constituencies (7.04), with an average constituency size of 75,174 when our proposed allocation of seven whole constituencies is made. This average constituency size is, again, extremely close to the electoral quota of 74,769 and we saw no advantage in grouping Suffolk with any other county. We therefore propose to construct seven constituencies within its county boundary.

Initial proposals for the Cambridgeshire, Hertfordshire and Norfolk sub-region

28 There are currently 27 constituencies in the sub-region, only seven of which are within 5% of the electoral quota (Hertford and Stortford, Hitchin and Harpenden, North East Hertfordshire, South West Hertfordshire, Broadland, Mid Norfolk, and South West Norfolk). Of the remaining constituencies, 13 are below the lower limit and seven above the upper limit.

29 We first considered which of the seven constituencies within 5% of the electoral quota we could leave unchanged. We found that we were able to propose leaving Hitchin and Harpenden wholly unchanged. All of the other six constituencies that presently fall within 5% of the electoral quota we propose to change in order to formulate constituencies across the entire sub-region that are within 5% of the electoral quota.

30 In order to increase the electorate of the existing Cambridge constituency to within 5% of the electoral quota we propose the inclusion of the Milton ward (from the District of South Cambridgeshire) and the Queen Edith's ward (City of Cambridge). The Milton ward is currently in the South East Cambridgeshire constituency; the Queen Edith's ward is currently in the South Cambridgeshire constituency.

31 We propose to add the District of Huntingdonshire ward of Earith from the existing North West Cambridgeshire constituency to the South East Cambridgeshire constituency, in order to contribute to bringing North West Cambridgeshire's electorate of 89,991 within 5% of the electoral quota. We also propose to add the City of Peterborough ward of Fletton and Woodston (from the existing North West Cambridgeshire constituency) to the Peterborough constituency, which has the necessary effect of bringing both the North West Cambridgeshire and Peterborough constituencies within 5% of the electoral quota.

We considered whether a better 32 pattern of constituencies could be formulated by not including the City of Peterborough wards of Newborough, and Eye and Thorney, in the Peterborough constituency and instead including the ward of Stanground Central (City of Peterborough), which lies to the south of the city, in order to create a more compact borough constituency. We came to the conclusion that opting for this pattern would have resulted in unnecessary changes to existing constituency boundaries and would have split the settlement of Stanground between constituencies.

33 We propose to transfer two District of South Cambridgeshire wards (Fulbourn and Linton), from the South East Cambridgeshire constituency, to our proposed South Cambridgeshire constituency, in order to keep both within 5% of the electoral quota.

34 We propose to add the District of Huntingdonshire ward of Gransden and The Offords from the Huntingdonshire constituency (electorate 81,303) to our South Cambridgeshire constituency, in order to keep the Huntingdonshire constituency within 5% of the electoral quota. Consequently, to keep South Cambridgeshire within 5% of the electoral quota we propose to transfer three wards from it (the District of South Cambridgeshire wards of The Mordens, Bassingbourn, and Melbourn) into our proposed North East Hertfordshire constituency. We propose this crosscounty boundary constituency because the constituencies in Cambridgeshire have such large electorates that it is not possible to propose seven constituencies contained wholly within the county's boundaries. In addition, we note that there are good transport links between Royston in the existing North East Hertfordshire constituency and the villages in the three Cambridgeshire wards in question. We also note that Royston is the closest market town for these villages.

35 To bring the North East

Cambridgeshire constituency below the 5% upper limit we propose to include the wards of Littleport East and Littleport West (both from the District of East Cambridgeshire) in our proposed South West Norfolk constituency (discussed further below).

36 As mentioned above, our proposed North East Hertfordshire constituency includes three wards from the existing South Cambridgeshire constituency. The transfer of these wards brings our proposed South Cambridgeshire constituency within 5% of the electoral quota. It also brings North East Hertfordshire back above the lower 5% limit, following our proposal to transfer two District of East Hertfordshire wards (Walkern and Watton-at-Stone) to the Stevenage constituency; and to transfer two other District of East Hertfordshire wards (Hertford Rural North and Hertford Rural South) to the Welwyn Hatfield constituency (bringing the latter above the lower 5% limit).

37 In the south of the Watford constituency there have been some modifications to local government ward boundaries around the Oxhey Hall and Hayling ward, the South Oxhey ward, and the Carpenders Park ward. These new ward boundaries, combined with the fact that the existing Watford borough constituency is – at 81,860 electors – above the upper 5% limit, mean some change to it and to surrounding constituencies is inevitable.

38 Our proposed South West Hertfordshire constituency transfers the District of Three Rivers ward of South Oxhey to the Watford constituency. This transfer compensates for the inclusion of the Borough of Dacorum ward of Ashridge in South West Hertfordshire. Although the existing South West Hertfordshire constituency is within 5% of the electoral quota, we have made these changes in order to bring neighbouring constituencies within 5% of that quota.

39 The Watford constituency has also had the divided District of Three Rivers ward of Gade Valley transferred from it into our proposed Hemel Hempstead constituency (bringing the latter above the lower 5% limit). We also propose to transfer two other District of Three Rivers wards (the divided Abbots Langley & Bedmond, and Leavesden) from the Watford constituency into our proposed St Albans constituency. The latter is, as a result of these changes, brought up above the lower 5% limit. These proposals, plus the inclusion of the District of Three Rivers ward of Carpenders Park in our proposed Hertsmere constituency, bring Watford within 5% of the electoral quota. The inclusion of the Carpenders Park ward in Hertsmere also brings that constituency within 5% of the electoral quota.

40 In order to bring the Broxbourne constituency above the lower 5% limit we propose to include in it the District of East Hertfordshire ward of Great Amwell, from the existing Hertford and Stortford constituency. We could instead have included the Borough of Hertsmere ward of Potters Bar Oakmere in the Broxbourne constituency but considered that this would divide the town of Potters Bar between constituencies. Despite the transfer of the Great Amwell ward, Hertford and Stortford remains within 5% of the electoral quota.

41 To bring the electorate of the Great Yarmouth constituency within 5% of the electoral quota we have transferred to it the District of South Norfolk ward of Thurlton (from the South Norfolk constituency). We propose to include in our South Norfolk constituency the wards (from the District of South Norfolk) that surround and make up the town of Wymondham (Northfields, Rustens, Abbey, Town, and Cromwells). These wards are in part included in the South Norfolk constituency to make up for the transfer of the Thurlton ward to Great Yarmouth.

42 The transfer of the Wymondham wards to the South Norfolk constituency was also required to offset the inclusion of the South Norfolk District wards of Cringleford and Old Costessey, in our proposed Norwich South constituency, to bring the latter within 5% of the electoral quota. In order to bring the Norwich North constituency above the lower 5% limit we propose to transfer to it the City of Norwich ward of Wensum from Norwich South.

43 To bring the North Norfolk constituency within 5% of the electoral quota we propose to transfer into it the District of Broadland ward of Aylsham, from the Broadland constituency. In order to bring the Broadland constituency back above the lower 5% limit we propose to include in it the District of North Norfolk ward of Briston, from the existing North Norfolk constituency, in addition to including the District of Breckland ward of Hermitage, from the existing Mid Norfolk constituency. Following these changes and due to the transfer of the wards around Wymondham, we propose to include in Mid Norfolk the Harling & Heathlands ward, and the Guiltcross ward (both from the District of Breckland), from the existing South West Norfolk constituency. These changes bring Mid Norfolk within 5% of the electoral quota. We note that modifications of local government ward boundaries in the wards of Launditch, Ashill, All Saints & Wayland, and The Buckenhams & Banham have resulted in changes to Mid Norfolk's boundary.

44 In order to bring our proposed South West Norfolk constituency within 5% of the electoral quota we propose that it now include the two District of East Cambridgeshire wards of Littleport East and Littleport West, from the current North East Cambridgeshire constituency (as discussed above). Our proposed transfer of the Borough of King's Lynn and West Norfolk ward of Walton, from the South West Norfolk to the North West Norfolk constituency, brings the latter within 5% of the electoral quota.

Initial proposals for the Bedfordshire sub-region

45 Of the existing six constituencies in the ceremonial county of Bedfordshire, only one is within 5% of the electoral quota – the constituency of South West Bedfordshire. Of the remaining five constituencies, two are above the upper 5% limit (Mid Bedfordshire and North East Bedfordshire). The remaining three constituencies (Bedford, Luton North and Luton South) all have electorates below the lower 5% limit.

46 We considered first how we could keep South West Bedfordshire unchanged but found this was not feasible given the changes needed to surrounding constituencies in order to bring them within 5% of the electoral quota.

47 The existing constituency of North East Bedfordshire has an electorate of 83,599. In order to bring it within 5% of the electoral quota we propose to transfer the Borough of Bedford ward of Eastcotts to the Mid Bedfordshire constituency. This change and local government ward boundary changes (to the Borough of Bedford wards of Eastcotts, Kempston Rural, Clapham, and Great Barford; and to the Central Bedfordshire Council wards of Arlesey, and Northill) bring the North East Bedfordshire constituency within 5% of the electoral quota.

48 In order to bring the Mid Bedfordshire constituency within 5% of the electoral quota we propose to transfer the wards of Aspley and Woburn, Toddington, and Barton-le-Clay (all Central Bedfordshire Council wards) into South West Bedfordshire. The existing South West Bedfordshire constituency has 76,959 electors so the addition of these wards pushes it above the upper 5% limit. Local government boundary changes to the Central Bedfordshire Council ward of Caddington have partially mitigated this consequence, by transferring some electors from South West Bedfordshire into the Luton South constituency. But, in addition, we propose to transfer the Central Bedfordshire Council wards of Tithe Farm, Parkside, and Houghton Hall from South West Bedfordshire into our proposed Luton North and Houghton constituency. These wards comprise the town of Houghton Regis, the whole of which we propose be included in Luton North and Houghton.

49 Local government boundary changes to the Elstow and Stewartby ward, the Goldington ward and the Kempston Rural ward are enough to bring our proposed Bedford constituency within 5% of the electoral quota.

50 We propose to include in Luton South the ward of Barnfield (Borough of Luton), from the existing Luton North constituency, resulting in both the Luton South and Luton

North constituencies being brought within 5% of the electoral quota.

51 As a result of the changes we propose in Luton and its surrounding area, all of the Central Bedfordshire Council wards that comprise the town of Dunstable are included in our proposed South West Bedfordshire constituency.

Initial proposals for the Essex sub-region

52 The county of Essex (including the boroughs of Thurrock and Southend-on-Sea) currently has seven constituencies within 5% of the electoral quota (Braintree, Brentwood and Ongar, Chelmsford, Colchester, Epping Forest, Rayleigh and Wickford, and Thurrock). We considered how many of these constituencies we could keep unchanged. Given the need to reduce the number of constituencies in Essex from 18 to 17, we have only kept three constituencies completely unchanged: Chelmsford, Epping Forest, and Thurrock. We propose that the Colchester constituency has just one ward transferred to it, namely the Borough of Colchester ward of East Donyland, from the existing Harwich and North Essex constituency.

53 Our proposed Harlow constituency includes the District of Epping Forest wards of North Weald Bassett, and Moreton and Fyfield, from the existing Brentwood and Ongar constituency, which brings it within 5% of the electoral quota.

54 Under our proposals, the Brentwood and Ongar constituency has seen substantial change, even though the constituency is currently within 5%

of the electoral quota. This change is due to the fact that the constituencies surrounding it (apart from the existing constituency of Epping Forest) have electorates outside 5% of the electoral quota. Two wards have been transferred from Brentwood and Ongar to the South Basildon and East Thurrock constituency (both from Brentwood Borough). We also propose including in Brentwood and Ongar four wards from the Borough of Chelmsford (these wards are currently within the Saffron Walden constituency). To compensate for these changes we propose transferring four wards from the existing Braintree constituency (all from the District of Braintree) into Saffron Walden. As a result of the latter changes, we propose that the Braintree constituency include three wards from the existing Witham constituency (all from the District of Braintree). These changes to the Brentwood and Ongar constituency, to the Braintree constituency and to the Saffron Walden constituency bring them all within 5% of the electoral quota.

55 We propose to transfer two wards from Basildon and Billericay (both Borough of Basildon wards) into the South Basildon and East Thurrock constituency (Laindon Park ward, Lee Chapel North ward). To make up for these changes, and to make up for the fact that the existing Basildon and Billericay constituency has an electorate of 64,885, we have also included in it the three (Borough of Basildon) wards that make up the town of Wickford. We also propose transferring a ward to Basildon and Billericay from the City of Chelmsford (South Hanningfield, Stock and Margaretting ward). These changes to Basildon and Billericay, and to South Basildon and East Thurrock, bring them both within 5% of the electoral quota.

56 We propose transferring the two (Borough of Basildon) wards of Pitsea North West and Pitsea South East to the Castle Point constituency. In turn, we propose to transfer from the latter constituency two (Borough of Castle Point) wards to the Southend West constituency. Additionally we propose to transfer the Ashingdon and Canewdon ward (from the District of Rochford) into the Rochford and Southend East constituency. All these changes to the constituencies of Basildon and Billericay, Castle Point, Rochford and Southend East, South Basildon and East Thurrock, and Southend West result from each of these constituencies currently being outside 5% of the electoral quota, and from the fact that the total allocation of constituencies in Essex has been reduced by one.

57 We propose to rename the Rayleigh and Wickford constituency Rayleigh and Woodham Ferrers. This renaming recognises the fact that we propose not to include the town of Wickford in this constituency. It also reflects the fact that we propose to include four wards from the City of Chelmsford (including the town of South Woodham Ferrers and the village of Woodham Ferrers), as well as one ward from the District of Maldon.

58 We propose that the Maldon constituency transfer one ward (Borough of Chelmsford) to the constituency of Basildon and Billericay (as mentioned above) and five wards to the constituency of Rayleigh and Woodham Ferrers (four City of Chelmsford wards and one District of Maldon ward). To compensate for this transfer and the fact that the electorate is currently 68,924, we propose to include in this constituency ten wards to the north and west of Maldon (one from the

City of Chelmsford, five from the District of Braintree and four from the District of Maldon). Much of this change to the Maldon constituency is due to the fact that we have to reduce the number of constituencies in Essex by one. As this constituency now includes nine wards from the former Witham constituency, we propose to call it Witham and Maldon.

59 At present the Harwich and North Essex constituency surrounds the Colchester constituency at its north-west, north, east and south sides, taking in the port of Harwich to the east. We propose to modify this arrangement by pairing Harwich with Clacton-on-Sea in a Harwich and Clacton constituency. In addition, we propose a North East Essex constituency that completely surrounds the Colchester constituency. Our proposed North East Essex constituency comprises 13 wards from the Borough of Colchester and ten wards from the District of Tendring. As a result, the villages of Point Clear, St. Osyth, Seawick and Jaywick are no longer included in a constituency with Clacton. The entirety of our proposed Harwich and Clacton constituency falls within the District of Tendring.

Initial proposals for the Suffolk sub-region

60 Of the seven existing constituencies in Suffolk, five are currently within 5% of the electoral quota. Of these we have been able to leave four unchanged, apart from modifications to accommodate changes to local government ward boundaries: Central Suffolk and North Ipswich, Suffolk Coastal, Waveney, and West Suffolk.

61 The existing lpswich constituency falls below the 5% lower limit at 70,702. To bring it within 5% of the electoral quota we have included in it the Pinewood ward from the South Suffolk constituency (from the District of Babergh). To compensate for this change we have transferred three wards from Bury St Edmunds (the wards of Rattlesden, Onehouse, and Ringshall from the District of Mid Suffolk) to South Suffolk. The existing Bury St Edmunds constituency is the only one in the county above the upper 5% limit with an electorate of 83,477. Accordingly, we have not needed to make further changes following the inclusion of these Bury St Edmunds wards in our South Suffolk constituency.

4 How to have your say

62 We are consulting on our initial proposals for a 12-week period, from 13 September 2016 to 5 December 2016. We encourage everyone to give us their views on our proposals for their area – the more public views we hear and the more local information that is provided, the more informed our decisions will be when analysing all the views we have received.

63 On our interactive consultation website, at www.bce2018.org.uk, you can see what constituency you will be in under our proposals, and compare it with your existing constituency and local government boundaries. You can also easily submit your views on our proposals.

64 When making comments on our initial proposals, we ask people to bear in mind the tight constraints placed on the Commission by the rules set by Parliament, discussed in chapter 2 and in our *Guide to the 2018 Review*. Most importantly, in the Eastern region:

- we cannot recommend constituencies that have electorates that contain more than 78,507 or fewer than 71,031 electors;
- we are basing our initial proposals on local government ward boundaries (from May 2015) as the building blocks of constituencies – our view is that, in the absence of exceptional and compelling circumstances, it would not be appropriate to divide wards in cases where it is possible to construct constituencies that meet the electorate rules without doing so; and

 we have constructed constituencies within regions, so as not to cross regional boundaries – compelling reasons would need to be given to persuade us that we should depart from this approach.

65 These issues mean that we encourage people who are making a comment about their local area to bear in mind any knock-on effects that might result from their suggestions. The Commission must look at the recommendations for new constituencies across the whole region (and, indeed, across England). What may be a better solution for one location may have undesirable consequences for others. We therefore ask everyone wishing to respond to our consultation to bear in mind the impact of their counter-proposals on neighbouring constituencies, and on those further afield across the region.

How can you give us your views?

66 Views can be given to the Commission either in writing or in person (oral representations). We encourage everyone who wishes to comment on our proposals in writing to do so through our interactive consultation website, at www.bce2018.org.uk – you will find all the details you need and be able to comment directly through the website. We also welcome oral representations at one of a series of public hearings we are conducting during the consultation period. People are welcome to both attend a hearing and submit comments through our website if they choose to.

Written representations

67 As stated above, we strongly encourage everyone to make use of our consultation website, at www.bce2018.org.uk, when responding to our consultation. The website allows you to explore the map of our proposals and get further data, including the electorate sizes of every ward and polling district. You can also upload text or data files you may have previously prepared setting out your views.

68 We encourage everyone, before submitting a representation, to read our approach to protecting and using your personal details (available at www.bce2018.org.uk). In particular, respondents should remember that we

are obliged to publish all the comments we receive on our initial proposals. As this is a public consultation, we publish respondents' names and addresses, alongside their comments.

Public hearings

69 The Commission will be hosting public hearings across England. In the Eastern region we will be hosting four public hearings during the consultation period. Our website (www.bce2018.org.uk) has more details of these hearings, and an opportunity to register to attend and give us your views in person. The table below shows the locations and dates of the hearings in the Eastern region.

Town	Location	Dates
Chelmsford	Civic Centre, Duke Street, Chelmsford CM1 1JE	Monday 31 October – Tuesday 1 November 2016
Norwich	The Assembly House, Theatre Street, Norwich NR2 1RQ	Thursday 3 – Friday 4 November 2016
Luton	Town Hall, George Street, Luton LU1 2BQ	Monday 7 – Tuesday 8 November 2016
Cambridge	Guildhall, Market Hill, Cambridge CB2 3QJ	Thursday 10 – Friday 11 November 2016

70 The purpose of the hearings is for people to have an opportunity to put their views on our proposals directly to an Assistant Commissioner who will chair the hearings and subsequently assist the Commission in the analysis of all the evidence received in the region. The hearings differ from the way we used to conduct 'local inquiries' in past reviews - these were much more judicial in style, and people were allowed to crossexamine each other. The legislation that Parliament introduced specifically rules out such inquiries, specifying instead that we host 'public hearings', which are intended purely as a way for people to make representations orally, directly to representatives of the Commission, as well as to provide an opportunity for the Commission to explain its proposals.

71 It is important to stress that all representations, whether they have been made through our website, in person at a hearing, or sent to us in writing, will be given equal consideration by the Commission. Therefore it does not matter if you are unable to attend or speak at a public hearing – even after the last public hearing in the Eastern region has finished, you will still have until 5 December 2016 to submit your views to us.

72 You can find more information about public hearings, and can register to attend, on our website at www.bce2018.org.uk, or by phoning 020 7276 1102.

What do we want views on?

73 We would like particularly to ask two things of people responding to our consultation. First, if you support our proposals, please tell us so. Past experience suggests that too often people who are happy with our proposals do not respond in support, while those who object to them do respond to make their points. That can give a rather distorted view of the balance of public support or objection to proposals, and those who in fact support our initial proposals may then be disappointed if those proposals are subsequently revised in light of the consultation responses. Second, if you are considering objecting to our proposals, do please use the resources (such as maps and electorate figures) available on our website and at the places of deposit to put forward counter-proposals which are in accordance with the rules to which we are working.

74 Above all, however, we encourage everyone to have their say on our initial proposals and, in doing so, to become involved in drawing the map of new Parliamentary constituencies. The more views and information we get as a result of our initial proposals and through the subsequent consultation phases, the more informed our consideration in developing those proposals will be, and the better we will be able to reflect the public's views in the final recommendations we present in 2018.

Annex A: Initial proposals for constituencies, including wards and electorates

Constituency	Ward	District/borough/city/county	Electorate
1. Basildon and Bi	llericay CC		74,410
