

This is our plan for how we want to make life better for people with autism

We are all working together

Wendi is the Executive Director for People & Communities for Peterborough City Council (PCC) & Cambridgeshire County Council (CCC)

Carol Anderson is the Head Nurse for Cambridgeshire and Peterborough Clinical commissioning Group (CCG)

They hope it will help make Cambridgeshire and Peterborough autism friendly.

They want to thank all the people involved in writing this plan: people with autism, parents and carers, these local partners, and many others

They hope it will help make everyone in Cambridgeshire and Peterborough more aware of what people with autism need from them to have a good life

What is autism?

Autism is something you have for the whole of your life

About 1 in 100 people have autism

Autism affects how you understand other people

Autism affects how you make sense of things

Everyone with autism is different

Some people with autism might find it hard to meet people and make friends

Some people might find it hard to say what they need or how they feel

Some people might find it hard being in loud places or where there are lots of people or bright lights

Some people with autism are very good at understanding numbers and patterns

Some people with autism are very good at thinking creatively and solving problems

Some people with autism are very good at remembering things

This is what we want for people with autism in the future (our vision)

We want people with autism to be accepted and valued as individuals

We want them to be treated with respect and to be listened to

We want them to be understood and included in how services are developed to support them

We want people with autism to have the same opportunities as other people to achieve their goals in life

This might mean living independently

It might mean being able to work locally if they wish to

Here are the 5 most important things we need to do to improve services for people with autism

1) People should be supported by people who are trained and understand autism, and how autism affects people

To do this we need to make sure all doctors, health care and social workers, teachers and others know about autism

2) People with autism should be identified as soon as possible

To do this we need to make sure the way to find out if you have autism is clear, and that there is help and support along the way

3) Children and young people with autism need support to help them prepare for adulthood

This will include help with housing and getting and keeping a job

And working with the police to make sure you feel safe where you live and work

4) People with autism need support to get the healthcare they need to live well

We will work with doctors, dentists, hospitals, and others to make sure people feel comfortable visiting them

We will make sure people get the support and information they need about health services

5) Parents and carers should have the help and support they need

To do this we will make sure people know how we can help or show them where to get support

Next steps

Over the next 5 years we will be working with people with autism, their families and carers to make sure this plan happens
