The Head of Resilience introduced the report to Committee, which outlined Risk Management: Strategic Risks, which was submitted to the Audit Committee as a routine planned report on risk management.

The Head of Resilience responded to comments and questions raised by Members. In summary responses included:

- Information governance included digital safeguarding of both paper and electronic records. The correct policies were in place regarding disclosure of information and were constantly evolving;
- Computer security was covered by Information Communications Technology ICT policies;
- Strategic risks were identified by departments via a risk register and escalated where necessary to Corporate Management Team who then decided if it was necessary to record them on the Risk Register;
- As a standard part of the procurement process it was scrutinised and stressed tested in terms of ability to deliver alongside safeguards in terms of payment arrangements;
- Discussions took place with regard to how often the Committee should be updated to those areas within the red zone;
- When the risk score remains unchanged, the associated action points should be taken into consideration as they had often been considerably expanded since the previous register; in order to introduce extra measures to try to reduce the score; and
- The Financial Position score had improved since the last register; this had been due to the time within the year of the update rather than year on year.
