**CSC Commentary**
The number of children in care per 10,000 of the population in September has remained static for the last two months. It is too early to hypothesise on the last two months' data, but it could be suggested that the reduction in referrals since the MASH has moved and the soft launch are beginning to indicate some early positive impact on children being accommodated.

**Definition**
Number of children in care divided by the population of 0-17 year olds in Peterborough multiplied by 10,000
The number of children in care is taken as a snapshot count at the end of each month
 Population for denominator:  47715

**CSC Commentary**

Admissions per 10,000 for September again saw a decrease in children being accommodated on previous month

**Definition**

Children who came into care (rolling 12 months) divided by the population of 0-17 year olds in Peterborough multiplied by 10,000. If a child is admitted to care on more than one occasion then each time is counted in this indicator.
Population for denominator: 47715

**CSC Commentary**

The net change in the number of children in September was a static swing with the numbers entering and leaving remaining the same this month. However, it is still too soon to say the trend has been reversed. This target is still red at his time.
**Definition**

Net change in the number of children in care

**CSC Commentary**

Placement stability for the month of September continues to see this performance indicator remain in red. Joint partnership working with TACT has begun although it is recognised these are long term issues which will not see an immediate improvement overnight, linked to placements, commissioning and provider.

**Definition**

The percentage of children in care aged under 16 who had been in care continuously for at least 2.5 years who were living in the same placement for at least 2 years, or are placed for adoption and their adoptive placement together with their previous placement together last for at least 2 years.

**CSC Commentary**

September data for CIC reviews remain static from the previous month. This target is calcualted on a rolling year and when analysed recently with the QA service relates to a review that did not occur in January 17. The impact will continue for the rest of the year.

**Definition**

The percentage of Looked after children for at least one month, whose case was reviewed within the required timescales.

The denominator is children who are LAC for at least one month at the end of the reporting month.The numerator is the number of children who have not had a review in the last 12 months recorded as outside of timescale.

102

**CSC Commentary**

This target has decreased in September by 2.1%. This relates to 15 children who weren't seen on time by the end of the month.Half of these children sit outside Corporate Parenting, and this is being addressed with all managers.
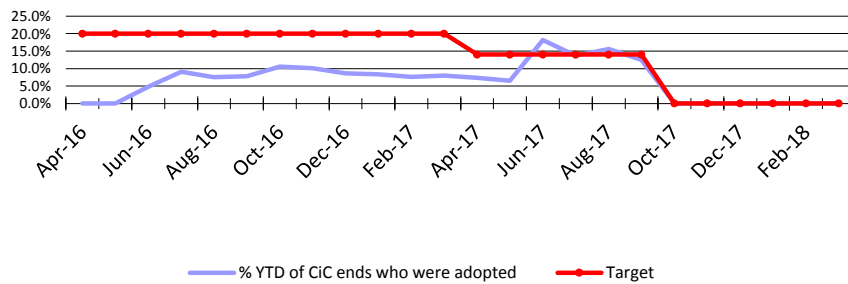

**Definition**

Of all Children in Care that have been looked after for more than 6 weeks, the number and percentage of visits that were completed within the 6 week deadline (or within three months for those Children in Care that have been looked after for more than 12 months and whose placement is deemed to be permanent). This is snapshot data taken at the month end.

**103**

**CSC Commentary**

There have been 5 adoptions to 30 September, with 0 adoptions recorded for September.

Consequently the number leaving care for the year to date is 1.5 % lower than the target of 14 %.

As there are 19 children in adoptive placements the year end figure is predicted to be approximately 25 adoption orders.

**Definition**

The number of children adopted as a percentage of the number of children who ceased to be in care

105

This indicator remains a challenge to achieve.  The children who have been adopted this year have waited longer to be matched with their adopters than is desirable. The average number of days has been adversely affected by a small number of children who were harder to place. This should improve through the year when children who have been placed more quickly will be adopted.

**Definition**

**CSC Commentary**

September has seen an increase in episodes of of children going missing and incidents. The two months are being compared given the swing in incidents and individuals going missing.

**Definition**

All missing incidents (including incidents occurring to CiC placed outside of Peterborough) for Children in Care recorded in the month; individuals is the number of children this involves (as some children may go missing more than once).

**CSC Commentary**

This performance indicator in September has seen an improvement in dental checks (10) being completed by month end, but further work is being undertaken with health colleagues to address this area. We will have a revised procedure to address this by the end of October.

**Definition**

The percentage of children looked after who have had a dental check within the previous 12 months.

Children looked after aged between 3 and 17 years old that have a dental check recorded on Liquidlogic that was completed within the previous 12 months. The denominator is the number of children looked after (3 - 17) at the month end.

**CSC Commentary**
Increased staffing levels in PVS have ensured that social workers are meeting the requirement of initial PEP completion within statutory timescales . PVS is now recording PEP meetings on Liquid Logic to ensure accuracy of data .

**Definition**
The denominator is the number of children in care who are of school age.  The numerator is of those children, the number that have a PEP added to the system.  This has been addressed with managers.

**CSC Commentary**

The TM of the Leaving Care team is the champion for ensuring that pathway plans are completed for all young people 16+.  Interrogation of the data indicates there is an issue with the way in which the data is recorded currently and this is being addressed with the performance team. However, it is recognised that the ICS system does not enable a 'run in' period of 2 months post a young person turning 16. This will therefore continue to be a fluctuating target given this issue. There are no plans curently to change this.

**Definition**

The percentage of leaving care cases with a pathway plan that has been updated within the last 6 months. The numerator is the number of children looked after cases assigned to the leaving care service that have a pathway plan which has been updated and recorded on Liquidlogic within the previous 6 months. The denominator is the number of children looked after assigned to the leaving care service as at the month end.

**CSC Commentary**
 The reduction in performance this month, is linked to a number of young people being in custody which has been unusual for this cohort of young people. To ensure accuracy this is being reviewed to understand the negative change.

This cohort includes those in custody and those who are of no fixed abode. Issues have been identified for those who have refused the option of supported accommodation and those who have been evicted from previous accommodation.   this month has seen a number of young people who have refused alternative accommodation and or are currently in custody. Work is being undertaken to develop closer joint planning with our housing department to ensure all options have ben considered.
