

### SPECIFIC ACTIONS TO ACHIEVE THE VISION AND APPROACH OUTLINED IN APPENDIX A

It is intended that opportunities will be exploited as they arise, however the following specific actions and possible methods of delivery have been identified under the headings used in the approach and also the vision and approach more generally.

	Specific action	Possible methods of delivery, consideration and comments
<b>Awareness Raising</b>		
1	<p>All City Council and contract staff directly involved in the management of open space should be given training and guidance on good management practice to safeguard and promote Biodiversity.</p> <p>This should include the identification of 'model' sites to demonstrate best practice.</p>	<p>Opportunities for internal and external training and guidance to be regularly brought to the attention of and where appropriate taken up by employees and members. Internal training to be requested from the councils own internal specialists where required.</p>
<b>Habitat Networks and Climate Change</b>		
2	<p>Where PCC owned or managed land forms part of a wildlife corridor its management will aim to facilitate its role as a part of the ecological network it is part of.</p>	<p>An analysis of habitat networks and gaps within them has identified that road verges are the main area where the City Council can directly contribute to increasing the connectivity of habitat networks. A number of specific examples have been identified for further investigation/progression.</p>
<b>Sites of Special Scientific Interest</b>		
3	<p>Secure funding for enhancement works and SSSI specific management for the PCC owned part of the Orton Pit SSSI.</p>	<p>This is the only PCC owned SSSI and consists of part of the treebelt which runs along the southern edge of the Fletton Parkway. Woodland grant scheme could be sought to cover a significant proportion of SSSI specific works within the Treebelt.</p> <p>Other opportunities to assist Natural England with the conservation and enhancement of SSSIs should also be supported. This may for example include efforts to create habitat links to connect SSSIs within the wider landscape as outlined under specific action 2 above.</p>
4	<p>Continue to work with Natural England in their role as statutory adviser in planning and development matters pertaining to SSSIs and International sites.</p>	<p>Continue dialogue at the strategic planning level as well as with respect to specific development proposals.</p> <p>Contributes to item 3 of the approach outlined as part of the vision statement.</p>

	Specific action	Possible methods of delivery, consideration and comments
<b>County Wildlife Sites</b>		
5	<p>All PCC County Wildlife Sites to be positively managed to conserve and where possible enhance the site for the criteria for which they are designated CWS.</p>	<p>Re-survey of all wildlife sites in the Peterborough area is in part covered under a service level agreement between the Wildlife Trust and the City Council.</p> <p>PCC are responsible for 12 out of 107 wildlife sites:</p> <p>Eye Green gravel pit                      The Boardwalks                      Debdale pond                      Broadway Cemetery                      Eastfield Cemetery                      Pocock's Wood                      Grimeshaw Wood, Highlees Spinney, Spencer's Hurn &amp; Water Spinney                      Holywell Fish Ponds                      Southey Lodge verge (Langley Bush Road).                      Stamford Rd./Heath Rd./ Ailsworth Rd./King St. verges (Includes "Marholm road" west of King Street Crossroad)                      Barnack road verges                      Bedford Purlieus-Wittering road verge</p> <p>One site is due to be added, this is 1400m of road verge at the south end of Highfield road.</p> <p>A number of possible actions have been identified which might be required to continue the positive management of these sites. This includes the drawing in of external funding for the restoration of woodland and minor amendments to mowing regimes for road verges.</p>
<b>Non native invasive species</b>		
6	<p>Employ best practice procedures to deal with invasive non native species on sites of wildlife importance; or where these are on land in the authorities control and threaten habitats and species of importance or the coherence of habitat networks.</p> <p>Otherwise the occurrence of invasive non native weed</p>	<p>Invasive species which are problematic in the Peterborough area and on sites managed by the authority include:</p> <p>Japanese Knotweed                      Giant Hogweed                      Orange Balsam</p>

	<b>Specific action</b>	<b>Possible methods of delivery, consideration and comments</b>
	species should be reported by PCC officers where this is observed as a result of carrying out their normal duties.	<p>The authority should also be on its guard against other problem species such as:</p> <p>Himalayan Balsam New Zealand pygmyweed Parrots feather</p> <p>Training in the recognition of these species should be organised for non specialist employees/contractors as required.</p> <p>One nature reserve currently has a problem with Japanese Knotweed although treatment of this has recently commenced.</p>
<b>The Planning System</b>		
7	Planning related departments of the City Council to continue to work with internal advisers, conservation bodies and local groups with respect to the production of a Local Development Framework and also specific development proposals.	Training as outlined in respect of specific action 1 in this table is also relevant in this respect.
<b>Green Spaces</b>		
8	In the short-term reasonably significant areas should be identified for trialling new approaches to landscape management.	<p>The area chosen should be large enough to contain a variety of types of landscape (e.g. parks, playing fields, kick about areas, open space in housing areas, etc). The trial should involve consultation with local residents and relevant departments within the City Council in planning the management of such areas, and offer a range of different options for particular sites within the trial area and the habitats they possess.</p> <p>Where appropriate this could be through the use of set conservation management specifications or where it would be beneficial the production of management plans for these spaces such as already demonstrated for Central Park. The possibility of reduction in management costs should be acknowledged as a possibility via this change in management<sup>1</sup>. The possibility of the creation of new purpose designed sites and habitats for wildlife and people should not be ruled out nor should the potential role of the PCC Agricultural Estate.</p>

<sup>1</sup> Such as identified in the Urban Forestry Report "Trees or Turf? Best value in managing urban green space".

	Specific action	Possible methods of delivery, consideration and comments
		<p>scheme.</p> <p>PCC support of projects such as Nature in Your Neighbourhood and any successor projects such as Access to Nature would be relevant in this respect.</p>
13	Recognise the role of allotments and cemeteries in promoting Biodiversity.	<p>For example:</p> <p>Opportunities should be taken where there is local support for the utilisation of disused allotments and closed cemeteries for promoting wildlife habitats.</p> <p>Allotments and cemeteries that are in use have a part to play with respect to Biodiversity. This is not intended to be in conflict with their operating requirements.</p> <p>Initiatives such as biodiversity guidance for allotment holders should continue.</p>
<b>Wider understanding</b>		
14	Support initiatives to encourage wildlife friendly gardening, recognising the increasing amount of land devoted to this usage.	For example via Peterborough in Bloom.
<b>Involvement and Local Wildlife Groups</b>		
15	With partners investigate the re-instatement of a Peterborough Wildlife Group or Wildlife forum.	<p>At a recent urban wildlife meeting with local wildlife groups; support was voiced for the possibility of bringing back the Urban Wildlife Group for Peterborough.</p> <p>Also see action above under broad approach 8 of the Vision statement, to give explicit support for small-scale community wildlife schemes, including encouraging community management of existing landscaping where requested and appropriate.</p>
<b>Biodiversity Action Plan Targets</b>		
16	Establish measurable annual targets for the creation of new areas of wildlife interest.	Including tree/shrub planting and woodland creation – both through the City Council's own land management and its role as a planning authority.

	Specific action	Possible methods of delivery, consideration and comments
		The Natural Networks partnership is investigating how the targets from the Green Grid Strategy, Cambridgeshire and Peterborough Biodiversity Action Plan and Peterborough Environment Audit can be brought together as one set of targets for Peterborough. If this were achieved it may be possible to further extract a set of targets for the City Council.
<b>Biodiversity Data</b>		
17	Continue to support the Biological Records Centre for Cambridgeshire and Peterborough.	A biological records centre is essential to enable effective and efficient management of biological and ecological data about Peterborough, but would be financially unsustainable if developed just for the Peterborough area. This data is a pre-requisite to the planning, implementation and monitoring of Biodiversity gain, as well as the achievement of more sustainable patterns of development. Effective management of biological data is also essential to the monitoring of the success or otherwise of the targets set out in the Cambridgeshire and Peterborough Biodiversity Action Plan.
<b>Overall Contribution to the Vision Statement and Approach</b>		
18	Give particular emphasis to the protection of ancient, and semi-natural habitats through all the City Council's activities.	For example ancient woodland and veteran trees.
19	Investigate and exploit external funding opportunities for creating and enhancing the Biodiversity value of City Council managed land. For example from Forestry Commission, Natural England, landfill tax or aggregates levy.	While much can be achieved by the City Council, this should be viewed as essential to achieving many of the actions listed above.
20	Continue to review the use of pesticides (including fungicides and herbicides) in the City Council's land management.	Such that their use is consistent, minimised and very carefully targeted in line with COSHH regulations requirements.
